sending the decode string to a remote server for processing;
receiving information about the object from the remote server wherein the information is based on the decode string of the object;
displaying the information on a display device associated with the portable electronic device.” See Exhibit A.

15. Claim 1 of the ‘752 Patent recites a non-abstract method for detecting symbology with an object within the digital image. The non-abstract method further decodes the symbology

using a visual detection application. The non-abstract method receives information based on the decode string of the object from the remote server.

DEFENDANT’S PRODUCT(S)

19. Defendant offers solutions, such as a QR code associated with the website for Firehouse-Subs (the “Accused Product”), that enables systems and methods for enabling portable electronic devices to present information about a selected object. For example, the Accused Product, at least in internal usage and testing, performs the method for enabling portable electronic devices to present information about a selected object. A non-limiting and exemplary claim chart comparing the Accused Product of Claim 1 of the ‘752 Patent is attached hereto as Exhibit B and is incorporated herein as if fully rewritten.

device that is part of a portable electronic device. Namely, Defendant uses the camera i.e., the part of the portable electronic device (smartphone) that captures the digital image. See Exhibit B.

23. As recited in another step of Claim 1, the system, at least in internal testing and usage, utilized by the Accused Product practices detecting symbology associated with an object within the digital image using a portable electronic device. Namely, Defendant uses a portable electronic device (Smartphone or tablet) to detect symbology (e.g., pattern of QR code) associated with the website of Firehouse-Subs. See Exhibit B.

24. As recited in another step of Claim 1, the system, at least in internal testing and usage, utilized by the Accused Product practices decoding the symbology to obtain a decode string using one or more visual detection applications residing on the portable electronic device. Namely, Defendant decodes the symbology (i.e., QR code pattern) to obtain a decode string (i.e. hyperlink) using the camera application residing in the portable electronic device (i.e., Smartphone). For example, the Smartphone decodes the QR code on the object image captured from the Smartphone camera to obtain a decoded hyperlink. See Exhibit B.

25. As recited in another step of Claim 1, the system, at least in internal testing and usage, utilized by the Accused Product practices sending the decode string to a remote server for processing. Namely, Defendant sends the decoded string to a remote server for processing. For example, the Smartphone sends the information associated with the QR code to Firehouse-Subs server. See Exhibit B.

26. As recited in another step of Claim 1, the system, at least in internal testing and usage, utilized by the Accused Product practices receiving information about the object from the remote server wherein the information is based on the decode string of the object. Namely, after clicking on the hyperlink that is obtained by scanning the QR code associated with the Firehouse-

Subs website, the smartphone receives the information and directly go to the website of Firehouse-Subs. See Exhibit B.

27. As recited in another step of Claim 1, the system, at least in internal testing and usage, utilized by the Accused Product practices displaying the information on a display device associated with the portable electronic device. Namely, Defendant sends the decode string to a remote server for processing. The information is received and it is displayed on the display associated with the Smartphone. See Exhibit B.

As such, Plaintiff is entitled to compensation for any continuing and/or future infringement up until the date that Defendant is finally and permanently enjoined from further infringement.

38. Plaintiff reserves the right to modify its infringement theories as discovery progresses in this case; it shall not be estopped for infringement contention or claim construction purposes by the claim charts that it provides with this Complaint.
